Prototype Design Walkthrough

CyberTrust KSA Platform

منصة الأمان السيبراني السعودية

February 2026 | Prototype v1.0

User Journey Overview

5 Key Scenarios from Sign-Up to NCA Certification

1

User Authentication & Onboarding

Secure login with MFA, bilingual interface, and 30-minute guided onboarding process

2

Compliance Dashboard Overview

Real-time compliance score, control status tracking, and actionable insights at a glance

3

Gap Analysis & Assessment

AI-powered gap identification across 65 NCA controls with prioritized remediation roadmap

4

Virtual CISO Interaction

24/7 AI chatbot for compliance guidance, policy generation, and expert recommendations

5

Cloud Integration Management

Connect 50+ cloud platforms for automated evidence collection every 15 minutes

Each scenario demonstrates key platform capabilities with actual UI screenshots

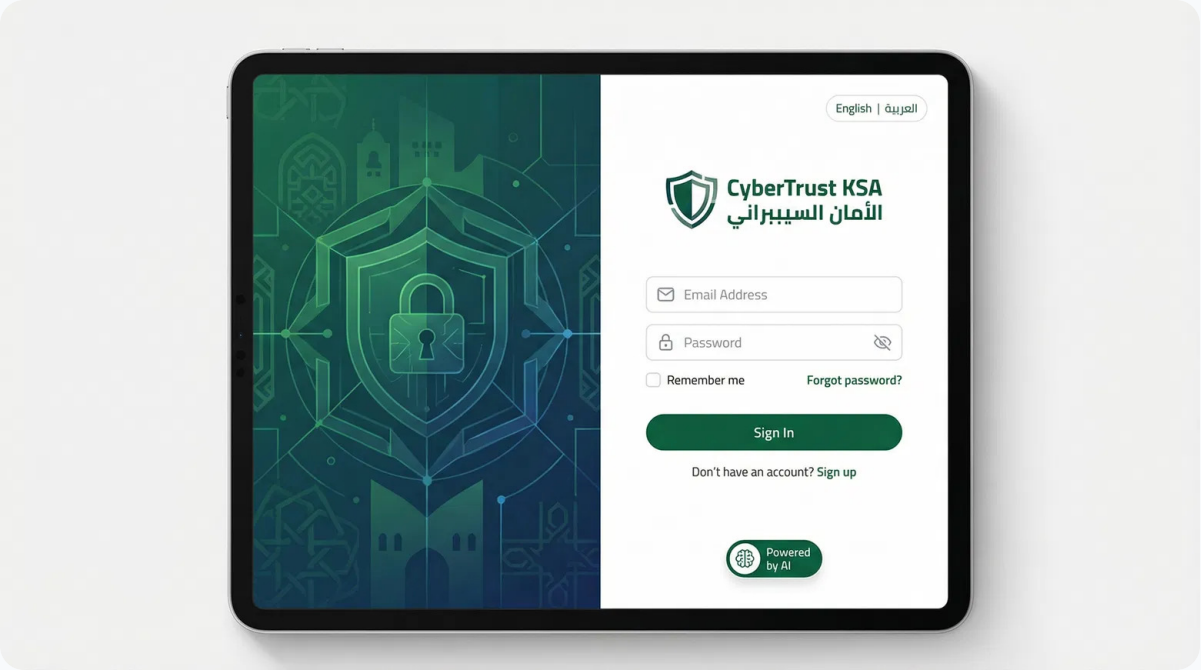
SCENARIO 1

User Authentication & Onboarding

Secure entry point to the CyberTrust KSA platform with multi-factor authentication, bilingual interface support, and guided 30-minute onboarding process.

Key Features Demonstrated:

- **Multi-Factor Authentication:** OAuth 2.0 with TOTP/SMS verification for enhanced security
- **Bilingual Support:** Seamless switching between English and Arabic interfaces
- **SSO Integration:** SAML 2.0 and OpenID Connect for enterprise authentication
- **Guided Onboarding:** Step-by-step setup wizard completing in 30 minutes
- **Role-Based Access:** Customizable permissions for CISO, compliance officers, and auditors



SCENARIO 2

Compliance Dashboard Overview

Real-time monitoring of compliance status, controls, and evidence collection

COMPLIANCE SCORE	TOTAL CONTROLS	GAPS IDENTIFIED	EVIDENCE COLLECTED
87%	65	8	1,247
↑ +5% this week	NCA ECC Framework	4 high priority	Auto-collected 24/7

Real-Time Monitoring

- Live compliance score updated every 15 minutes
- Control status tracking across all 65 NCA controls
- Instant drift detection with automated alerts
- Historical trend analysis and predictive insights

Quick Actions & Insights

- One-click gap remediation guidance
- Automated report generation for stakeholders
- Recent activity feed with audit trail
- Customizable widgets and role-based views

Generate Report

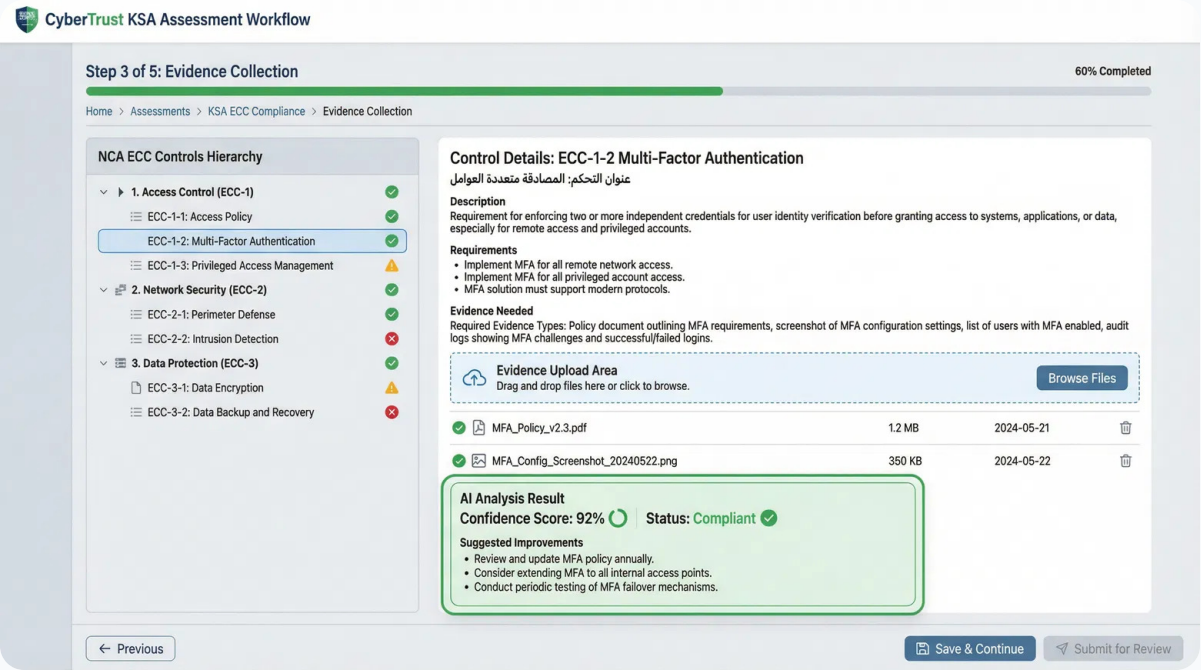
SCENARIO 3

Gap Analysis & Assessment

AI assessment scans your security posture against NCA requirements, finds gaps, and gives a prioritized remediation roadmap.

Key Features Demonstrated:

- **NCA Control Mapping:** Auto-maps evidence to 65 controls
- **Gap Identification:** Real-time detection across domains
- **Risk Prioritization:** Rank gaps by criticality and impact
- **Remediation Guidance:** Step-by-step fixes with effort estimates
- **Progress Tracking:** Visual dashboard for closure progress



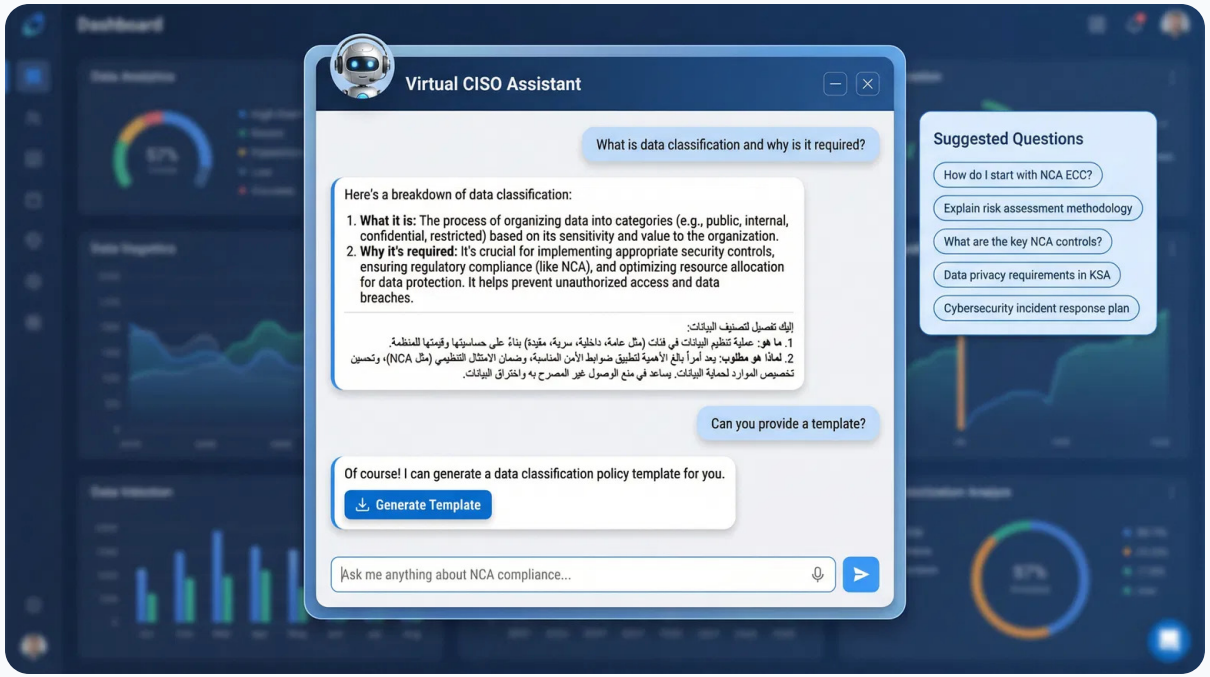
SCENARIO 4

Virtual CISO Interaction

24/7 AI-powered compliance expert trained on 10,000+ Saudi regulatory documents, providing instant guidance in Arabic and English.

Key Features Demonstrated:

- **AI-Powered Guidance:** GPT-4 model fine-tuned on NCA ECC, PDPL, SAMA frameworks
- **Bilingual Support:** Natural conversation in Arabic and English with context awareness
- **Policy Generation:** Create customized security policies in 2 minutes based on NCA requirements
- **Gap Remediation:** Step-by-step guidance for closing compliance gaps with implementation examples
- **Control Interpretation:** Detailed explanations of NCA controls with Saudi-specific context



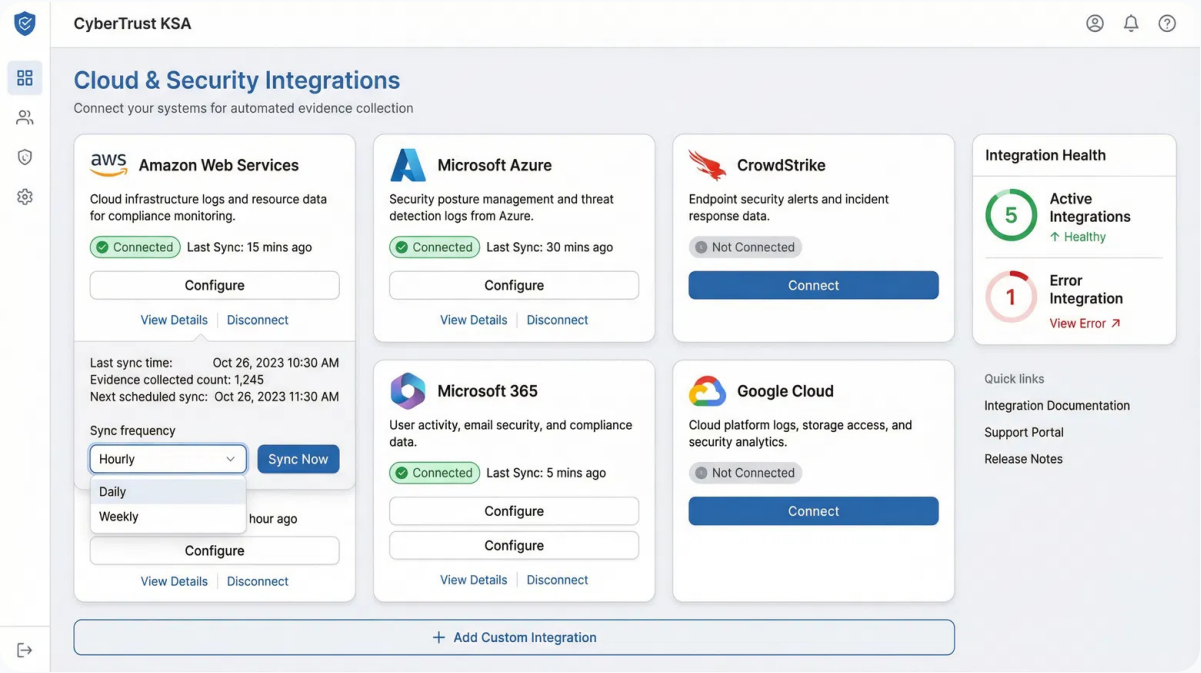
SCENARIO 5

Cloud Integration Management

Connect to 50+ cloud platforms and security tools for automated evidence collection every 15 minutes, eliminating 80% of manual compliance work.

Key Features Demonstrated:

- **50+ Cloud Integrations:** AWS, Azure, Google Cloud, Microsoft 365, CrowdStrike, Palo Alto Networks
- **Automated Evidence Collection:** Real-time data sync every 15 minutes with OAuth 2.0 authentication
- **One-Click Setup:** Pre-configured integration templates with guided configuration wizards
- **Integration Health Monitoring:** Real-time status tracking with instant alerts for connection issues
- **Custom API Support:** RESTful API and webhooks for proprietary tool integrations



Key UI/UX Features Demonstrated

Design Principles & User Experience Highlights Across All Scenarios

Bilingual Support

Seamless Arabic and English interface with RTL layout support and culturally adapted content

Accessibility First

WCAG 2.1 AA compliant with keyboard navigation, screen reader support, and high contrast modes

Mobile Responsive

Fully responsive design optimized for desktop, tablet, and mobile devices with native apps

Real-Time Updates

Live compliance score updates every 15 minutes with WebSocket connections for instant notifications

Consistent Design System

Unified color palette, typography, and spacing following enterprise SaaS best practices

Data Visualization

Interactive charts and graphs using D3.js and Chart.js for compliance metrics and trends

Role-Based Views

Customized dashboards for CISO, compliance officers, executives, and auditors

Security-First Design

Zero-trust architecture with session management, audit trails, and encrypted data transmission

Performance Optimized

Sub-200ms API response times, lazy loading, and optimized asset delivery for fast page loads

Development Roadmap & Next Steps

From Prototype to Production: Q2-Q4 2026 Timeline

1

Prototype Validation

Q2 2026 (4 weeks)

- Stakeholder feedback sessions
- UI/UX refinement based on input
- Technical architecture review
- Security audit and compliance check

2

User Testing

Q2 2026 (6 weeks)

- Beta testing with 10 pilot customers
- Usability testing sessions
- Performance and load testing
- Accessibility compliance validation

3

Development Sprint

Q3 2026 (12 weeks)

- Full-stack implementation (Python/MySQL)
- AI model training and integration
- Cloud integrations development
- Mobile app development (iOS/Android)

4

Production Launch

Q4 2026 (4 weeks)

- Infrastructure deployment (AWS/Azure)
- Final security audit and penetration testing
- Go-to-market campaign execution
- Official launch with 100 customers target
